EBDA AL MAAJIM
TRADING & CONTRACTING

EBDA AL MAAJIM

TRADING & CONTRACTING

CORPORATE COMPANY PROFILE

Diversified construction, trading, sanitary ware, telecom infrastructure, logistics, water supply and hospitality services.

RIYADH | SAUDI ARABIA

Operating history since 2002 / 2026 edition

Company at a glance

A diversified Saudi business with integrated commercial and project capabilities.

Ebda Al Maajim is a Riyadh-based company engaged in sanitary and plumbing products, general trading, construction and contracting, telecom infrastructure, transport and water supply, and hospitality activities. Its commercial operating history dates to 2002.

2002

Commercial operations in Saudi Arabia dating to 2002, building a long-standing trading and contracting presence.

70 IDENTIFIED PERSONNEL

55 Ajeer/contract personnel available for deployment, supported by 15 qualified company-listed personnel.

6 BUSINESS DIVISIONS

Construction; telecom; sanitary/plumbing; trading; transport and water supply; hospitality and general stores.

RIYADH BASE

Headquarters and sanitary ware showroom in Al Aqiq, Riyadh, with warehouse and transport operations.

Our operating approach

The company combines material sourcing, warehouse supply, site execution and fleet-based logistics. This diversified model allows customers to engage one business for complementary procurement, construction and operational services.

Creating value through quality, trust and innovation across trading, contracting and service sectors.

Vision, mission & values

OUR VISION

To become a leading Saudi company recognized for excellence, reliability and sustainable growth across diverse industries.

OUR MISSION

To provide high-quality solutions through experience, skilled teams, operational capabilities, transparency, integrity and customer satisfaction.

Core principles

QUALITY

A consistent focus on sound materials, workmanship and service standards.

INTEGRITY

Transparent commercial relationships, responsible conduct and realistic project commitments.

RELIABILITY

Coordinated project delivery, supply planning and dependable customer support.

SAFETY & GROWTH

Attention to workforce safety, continuous improvement and sustainable business development.

Six interconnected divisions

A broad portfolio serving contractors, developers, facilities and retail customers.

01 CONSTRUCTION

Civil and building works; site development; structural work; electrical and plumbing installations; low-current/security systems; finishing and maintenance.

02 TELECOM INFRASTRUCTURE

Greenfield site preparation; tower foundations; installation and erection; grounding; fencing; indoor building solutions and supporting network works.

03 SANITARY & PLUMBING

Riyadh showroom and warehouse; sanitary ware; faucets and fittings; pipes and drainage supplies; plumbing installation and project procurement.

04 TRADING & SUPPLY

Sanitary and electrical hardware; contractor materials; bulk ordering; sourcing, warehouse stock and project-site deliveries.

05 LOGISTICS & WATER

Truck-fleet transport, water tankers and construction-site water supply; delivery and logistics coordination.

06 HOSPITALITY & RETAIL

Restaurant and hospitality services alongside general-store and everyday retail activities.

Sanitary ware & plumbing

A longstanding business activity, supported by physical retail and storage facilities.

SHOWROOM + WAREHOUSE

The sanitary ware division operates a physical showroom in Al Aqiq, Riyadh, and a warehouse supporting product storage and sales. The division offers sanitary ware and plumbing materials across a broad product range.

Products & service areas

- Sanitary fixtures, basins, toilets, faucets and bathroom accessories
- Pipes, fittings and plumbing system materials
- Water supply, drainage and building plumbing solutions
- Bulk sanitary and electrical material supply for construction projects
- Retail sales, contractor orders and warehouse-backed fulfillment

Commercial heritage

Ebda Al Maajim reports a long-standing commercial relationship with KTP / Al Koblan Thermopipe Factory Co. The 2008 recognition and associated ceremony photographs are featured under Awards & Recognition.

The showroom and warehouse support retail sales, construction supply, and ongoing customer requirements.

Construction & contracting

Civil, structural and building services for commercial and infrastructure requirements.

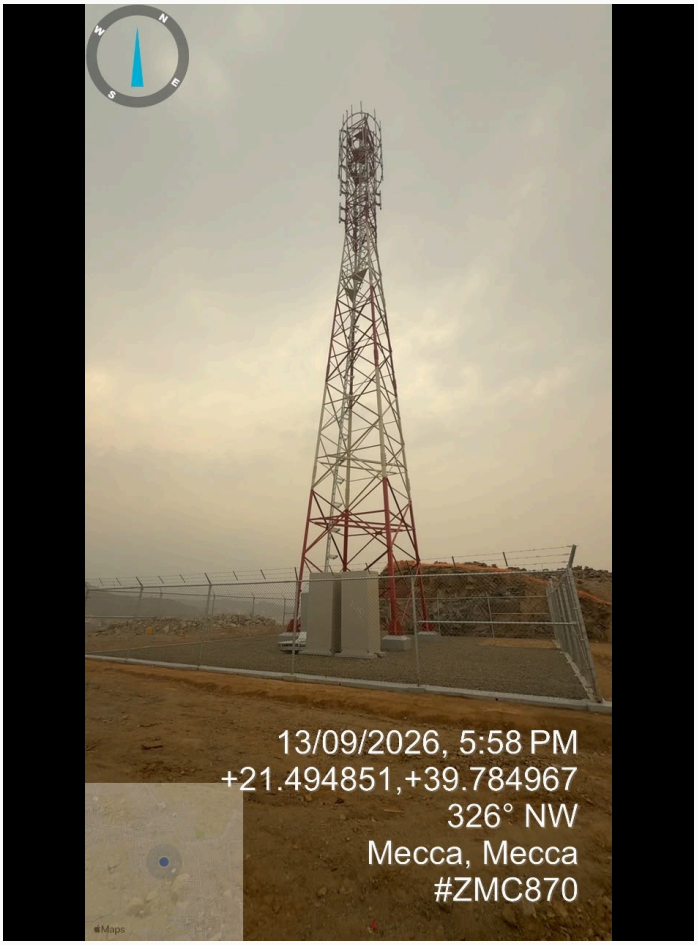
Execution capabilities

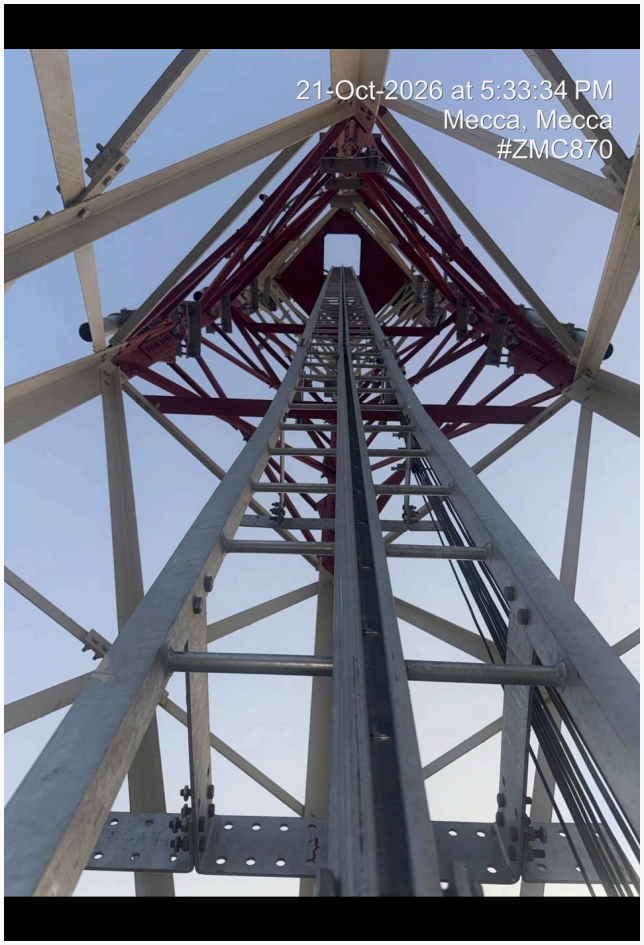
- Site preparation, excavation, concrete foundations and structural works
- General construction, building renovation and finishing
- Electrical, low-voltage, lighting, plumbing and drainage works
- CCTV, access control, cabling and related low-current installations
- Maintenance, repairs and technical project support

Featured project: Makkah telecom site ZMC870, illustrating excavation, reinforced foundations and completed site works.

Telecom infrastructure

From greenfield civil preparation to tower installation and site development.





Reported service scope

- Greenfield site development and civil construction
- Telecom tower foundations, erection and associated installation works
- Site grounding, fencing, equipment placement and handover support
- Nokia subcontracting and STC-related network site work

One completed telecom tower site in Makkah during 2026, with additional site works commencing. The business also supports broader civil and infrastructure requirements.

Makkah / ZMC870

2026 | Telecom tower site | Makkah, Saudi Arabia

Project record

- Site reference: ZMC870, Makkah, Saudi Arabia
- Completed scope reported: excavation, foundations, concrete and civil works
- Tower erection, grounding, perimeter fencing and site development
- Project completion and site handover reported for 2026
- Telecom works undertaken in the Nokia/STC network project context

A photographic project record documents the key stages: site preparation, reinforcement, concrete foundations, erection, equipment placement and the completed fenced compound.

Project construction sequence

Site ZMC870 | Makkah | Photographs supplied by company

01 SITE PREPARATION

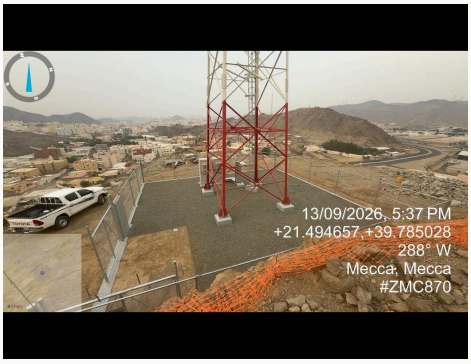
Rock excavation and site formation.

02 REINFORCEMENT

Foundation reinforcement and formwork.

03 FOUNDATION

Concrete foundation structures and pedestals.



04 COMPLETED SITE

Tower base, fencing and graded site.

Water supply & logistics

Transport capacity in support of construction, supply chains and facilities.

Fleet-linked services

- Tanker-based water transportation and supply to construction sites
- Water supply operations for facilities and project needs
- Trucking and material transportation
- Project logistics, dispatch coordination and site deliveries
- Support for internal construction and external customer requirements

OPERATIONAL RESOURCES

Ebda Al Maajim operates water-supply and transport activities supported by a truck fleet, with construction machinery resources used to support project and site requirements.

Integrated logistics and site-support capability

Customer segments

Construction projects, commercial facilities, bulk material buyers and other customers requiring scheduled transport, supply and site-logistics support.

Hospitality & general stores

Diversification beyond project-based construction and material supply.

Hospitality services

The diversified business portfolio extends to restaurant and hospitality-related services, bringing its customer-service values to food and beverage operations.

General stores & retail

General stores complement the wider trading portfolio, providing everyday consumer products and essential retail goods alongside the wider wholesale and project-supply activities.

CONNECTED BUSINESS ACTIVITIES

- Restaurant and hospitality operations
- General stores and retail services
- Customer-facing service activities
- Complementary trading and supply functions

This section describes the company's stated business lines and avoids inventing restaurant names, operating counts or customer volumes.

Clients, procurement & supply

Commercial relationships across development, materials and telecom sectors.

Named client / customer relationships

Mosa Al Mosa

Commercial relationship within the wider construction and trading portfolio.

Emmar Madan

Commercial relationship across the diversified business activities.

National Housing Company (NHC)

Commercial relationship within Saudi Arabian development and construction sectors.

Wareef

Commercial relationship within the customer portfolio.

Nokia / STC context

Telecom subcontracting experience in Nokia-related and STC network-site works.

Supply-chain approach

Material sourcing, showroom-based sales, warehouse stocking and coordinated delivery support both trade customers and project teams.

Workforce & organizational capacity

Skilled workforce and operational support capacity.

55 AJEER / CONTRACT

55 Ajeer/contract personnel available to support construction, logistics and project requirements.

15 COMPANY-LISTED

15 qualified company-listed personnel supporting technical, operational and administrative functions.

Awards & recognition

KTP / Al Koblan Thermopipe Factory Co. | 2008

National sales performance recognition

In 2008, Ebda Al Maajim achieved first position in Saudi Arabia for KTP product sales, receiving company recognition and vehicles as prizes. The award ceremonies and commemorative presentations form part of the longstanding commercial heritage of Ebda Al Maajim.

SALES HERITAGE & RECOGNITION

The company has maintained longstanding relationships in the sanitary and plumbing sector, including recognition and engagement with KTP / Al Koblan Thermopipe Factory Co.

Industry relationships in pictures

Selected photographs provided by management

Quality, safety & governance

A practical management approach across diversified operations.

Quality & service principles

- Plan and coordinate work scopes before mobilisation or supply commitments
- Procure fit-for-purpose materials and manage inventory through warehouse operations
- Maintain clear communication with customers, main contractors and project stakeholders
- Monitor site progress, workmanship and completion documentation

Workforce safety

Worksite personnel use protective equipment appropriate to site activities, including helmets, high-visibility apparel and fall-protection harnesses for work-at-height tasks.

Registration & compliance records

The company maintains commercial and workforce-related documentation, including Commercial Registration and relevant VAT, Chamber of Commerce, GOSI, Mudad and Ajeer records, for applicable business processes.

A dependable business partner

Broad capabilities supported by commercial heritage, people and operational assets.

DIVERSIFIED PORTFOLIO

Six complementary divisions span construction, telecommunications, sanitary ware, material trading, transport, water supply and hospitality.

COMMERCIAL HERITAGE

A trading and contracting business history dating to 2002, with longstanding market relationships and KTP recognition.

PROJECT EXPERIENCE

Makkah ZMC870 demonstrates the complete lifecycle of a telecommunications site, from groundworks to tower construction and completion.

SKILLED WORKFORCE

70 identified personnel across contract and company-listed employment arrangements, supported by management and project operations.

SHOWROOM & WAREHOUSE

A physical sanitary ware showroom in Riyadh Al Aqiq, backed by warehouse facilities for product storage and supplies.

TRANSPORT & SITE SUPPORT

Truck-fleet logistics, water supply and construction machinery resources that complement contracting and trading services.
